

CVMR metal equipment rack

technical data sheet

key features:

- front 12 gauge rack rails
- built-in wire management system
- opened floor for easy access
- removeable front and rear doors

description:

The Convex CVMR series of equipment racks is available in four convenient sizes (12U, 24U, 35U and 44U). All include front EIA rack rail as well as a rear cable management system. The CVMR racks are a welded 14 gauge construction and ship complete with a removable rear door that can also be used on the front. CVMR racks have top and bottom removable ventilation panels in both the front and rear. CVMR racks have a black powder coat finish to give a durable, scratch resistant surface.

physical dimensions: CVMR series

CVMR12	12U rack 26.25" high 21.5" deep 22.5" wide
CVMR24	24U rack 49.59" high 21.5" deep 22.5" wide
CVMR35	35U rack 68.84" high 21.5" deep 22.5" wide
CVMR44	44U rack 84.59" high 21.5" deep 22.5" wide

architect's specification:

All 19 inch EIA compliant equipment shall be mounted into Convex CVMR series equipment racks. The racking equipment shall be manufactured of 14 gauge metal top and bottom having 16 gauge vertical sides. The rack shall have 12 gauge tapped 10-32 mounting rails. The rack shall include a wire management system built into the rear of the rack.

support hardware:

- CVBP blank panels
- CVVP vent panels
- CVSP security panels
- CVUT utility trays
- CVRD rack mount drawers
- CVSCW 10/32 rack screws
- CVWAS nylon flat washers
